

Genpact and AWS Forge Strategic Collaboration to Accelerate Enterprise AI Adoption

Genpact, a global professional services and solutions firm, announced a multi-year Strategic Collaboration Agreement (SCA) with Amazon Web Services (AWS) to accelerate enterprise-wide adoption of artificial intelligence (AI) and unlock business value at scale.

This collaboration is designed to move AI beyond traditional IT boundaries—enabling business leaders across finance, operations, procurement, and beyond to embed intelligence directly into decision-making and core workflows.

By combining Genpact’s deep industry expertise with AWS’s advanced cloud and AI capabilities, the collaboration simplifies access to cutting-edge technologies, empowering organizations to drive innovation, enhance agility, and deliver measurable outcomes.

As AI adoption accelerates globally, many organizations continue to face challenges in scaling beyond isolated use cases. The Genpact–AWS collaboration addresses this gap by democratizing access to AI—making it more accessible, scalable, and aligned to business priorities.

“Our collaboration with AWS is centered on bringing AI directly into the hands of business leaders,” said Murat Aksu, Global Leader for Partnerships, Genpact. “By breaking down traditional barriers, we are enabling organizations to move faster—from experimentation to enterprise-wide adoption—while delivering tangible business impact.”

As an AWS Premier Tier Services Partner, Genpact brings deep expertise in AI, data and analytics. With nearly 1,000 certified AWS professionals, Genpact helps clients unlock the full potential of AWS services, including Amazon Connect and Amazon OpenSearch, to modernize operations and scale AI solutions. Genpact's numerous offerings in AWS Marketplace include:

- ContactUs.Ai: an end-to-end AI-powered customer experience solution
- Property Contents Claim solution: powered by generative AI, allows seamless digital experience and automation from inventory creation through settlement
- riskCanvas Discovery: empowers financial institutions with process improvement and automation, including generative AI integration for efficient financial crime prevention and compliance

"We are expanding our collaboration with Genpact to drive AI transformation across industries," said Rima Olinger, Managing Director, North America Partners, AWS.

"Genpact's industry expertise and advanced technology capabilities make them a valuable partner in helping organizations harness AI effectively, empowering business leaders to leverage data-driven insights and achieve their strategic objectives."

This strategic collaboration reinforces Genpact and AWS's shared commitment to helping organizations transition to AI-driven, cloud-native operating models. By enabling faster adoption, greater flexibility, and scalable innovation, the partnership is positioned to deliver sustained value across industries.

About Genpact

Genpact (NYSE: G) is a global professional services and solutions firm delivering outcomes that shape the future.
